## EDUCATION

### Indian Institute of Information Technology

B.Tech Computer Science and Engineering **CGPA: 8.7**

Sri City, Chittoor, Andhra Pradesh

August 2016 - May 2020

## EXPERIENCE

### Skillbee (Node.js, Golang, Python, AWS)

Founding Member, Backend Engineer

Noida, India

Current

- Handled the backend, infrastructure and deployment on AWS and DigitalOcean, scaling from 5000 MAU to 300k+ MAU for the number 1 jobs platform in UAE.
- Built many critical high throughput microservices (Ex: 800K notifications daily, online walk-in interview solution that increased monthly recruitments by 6x).

### Couture.ai (Flask, React, Docker, Airflow, Superset)

Full Stack Developer, Full Stack Developer Intern

Bangalore

6th Jan 2020 | Feb 2021

- Lead a small team of engineers to create a data platform used by 3+ teams in Reliance like **Jio Set Top Box** and others in production env.
- More than **doubled** the inference throughput by creating a GPU-sensitive auto-scaling TFserving deployment using Nginx and Docker.
- **Mentored** and worked with a team of interns to create production ready services.
- Integrated an in-browser code editor with LSP support, created Airflow operators, Jupyterhub with the existing data-platform and created deployment manifests files for the existing platform reducing the time of deployment > 90%.

### IIIT Sri City (Java, Object Oriented Programming)

Undergraduate Teaching Assistant

Sri City, AP

- **Assisted** the course instructor to guide a batch of around 150 during the lab and tutorial sessions of “Overview of Computers” and “Object Oriented Programming” Course.

### EaseAssist Solutions Limited

Backend Developer Intern

Remote

June 2017 | July 2017

- Worked on their product, Refier: integrated **OAuth2** login methods, added a notification system using **django-notify-x**, import and export data from excel sheets into the database, **django haystack** with Elasticsearch to integrate search.

## SKILLS

<b>Programming Languages:</b>	C/C++, Python, Node.js, Golang
<b>Frameworks:</b>	Can pick up any in a small time-frame
<b>Databases, Messaging and Others:</b>	Docker, MongoDB, SQL, Firebase, AWS

## HOBBY PROJECTS

### Opensource contributions

- Created an experimental fullcalendar integration for django.
- Contributed to Chapel programming language, fixed bugs and documentation and added a String Utils library for Chapel programming language.

### Aphlabet (Online Classroom) Django, Vue.js, HTML, SQL, Bootstrap

- Lead the work on the frontend (**Vue.js**) and integrated it with backend **REST API** on this project which allowed students and teachers to create virtual classes.

## ACHIEVEMENTS

**Maintained backend and infra for an app with 1M+ downloads as a single member in the backend team** Skillbee

### 6th most trending Events category App

Google Play

Created the Techfesia 2018 mobile app, which went on to become the **6th most trending app** in the events category.
